Local Items

Mr. Hospenbury, of Collingwood district, who has been spending the past six weeks in Calgary, returned to his farm last Friday.

Mr. and Mrs. Geo. E. Jeffery left on Friday for Edmonton where they will reside.

Mrs. Rennie entertained a number of ladies at afternoon tea on Friday last. A most enjoyable afternoon was spent.

R. J. McLean left last week for Daysland where he has purchased a farm.

Mr. W. Smith, of Cereal, arrived in town last week. Mr. Smith is taking over the management of the Acadia Hotel Dining Rooms. We extend to Mr. Smith a hearty welcome to our town.

Mr. and Mrs. A. E. Proctor left on Friday for Bawlf, Alta., where they have rented a farm.

Under instructions from Mrs. S. Featherston, I will offer for sale at public auction, all her farm stock, machinery and household effects, etc., in front of the Acadia Hotel, Chinook, next Saturday, April 4. Sale to commence at 1 o'clock. J. N. Key, auctioneer.

Mrs. O. Hinds left on Wednesday of last week for Youngstown where she will visit for a short time before proceeding to Calgary.

Present conditions indicate that little seeding will be done until well into April in the Chinook district. A great deal of the land is still covered with snow and the recent thaws have covered the low places with water. The prospects look splendid for moisture, and a good start for the crops.

Mrs. W. E. Brownell was a visitor to the home of Mrs. S. Featherston for a few days this week.

The dance held in the Laughlin School last Friday night was a great success. The music was good and a fair crowd attended.

Service will be held in the Chinook Church next Sunday evening. Rev. R. T. Harden will conduct the service. You are invited to attend.

Born—To Mr. and Mrs. A. St. Clair Nicholson, at Edmonton on Friday, March 6, a son.

Rev. J. H. Bury, who has been in charge of church work in British Columbia, returned to his home at Collingwood on Tuesday.

Mr. and Mrs. J. Spital, Mrs. Spreman, Mrs. Bury and Mr. A. McLennan returned on Tuesday from Calgary where they have been attending the Nazarene Church Assembly.

The Chinook Ladies Aid are holding a Parcel Post Sale and Tea on Saturday, April 11. Further particulars will be given in next week's issue.

Mrs. Arthur Robinson, who was admitted to the Cereal Hospital on Saturday of last week, suffering from the after effects of the flu, is now nearly all right again.

Geo. Bonnet returned last week from Calgary to his farm north of town.

Mrs. W. H. Short and four children left this week to join Mr. Short at Blackie.

Mrs. E. G. Parsons is a visitor in Calgary this week.

Mrs. W. H. Bowman, of Crystal, who has been visiting her sons at Hawarden, Sask., for the past two weeks, returned on Wednesday.

The regular monthly meeting of the Chinook Women's Institute was held on Wednesday afternoon at the home of Mrs. Robt. Smith. A paper on "Easter" was read by Mrs. R. Vanhook which was much appreciated.

A. R. Downey, of Rearville, left on Tuesday for Munson where he has rented a farm.

Jim Featherston, who has been spending the winter at Halkirk, Alta., returned to town last week.

Considerable interest and amusement was caused at the Pleasant Hour Club on Monday evening when they had a debate. "Resolved that novel reading is detrimental." The affirmative was taken by Mary Clipsham and Ben Ferguson, and the negative by Audrey Neff and Roland Massey.

Mrs. John Gripp, of Oyen, is a visitor at the home of Mr. and Mrs. Peter Petersen this week.

Mrs. S. A. Wilton, of Rearville, who has been spending the past three months in Vancouver, returned last week.

Mrs. J. S. Foster, of Hanna, is visiting at the home of Mr. and Mrs. R. Vanhook.

The ladies card club met at the home of Mrs. J. Massey on Tuesday evening. Mrs. J. S. Smith won the first prize, while Mrs. R. Stewart won the consolation. The club will meet at the home of Mrs. E. E. Jacques next Tuesday evening.

The Local Enterprise

The local merchant should be supported as much as possible. The farmer is the deciding factor as to whether his town shall be poor or prosperous. Money sent to Mail Order Houses is lost for ever to your own community. One of the hardest jobs is to get satisfactory adjustment with business houses at a distance.

The local merchant must satisfy those who patronize him. He is meeting his customers face to face and has no excuse for not knowing just what is required of him. The local merchant helps to pay for roads, schools, etc., and he uses his influence for improvements in the district, which benefit the farmer as much as himself. If these things were left to the Mail Order House, our nearest town would be Saskatoon or Calgary. When you have an order give your local merchant a chance to quote prices, he wants your business and will give you every consideration. Be loyal to your community.

Pure Seed Oats Available

The provincial government cooperative seed plant at Edmonton has a considerable quantity of registered seed oats available at prices now ranging from 75 cents to \$1.00 a bushel. It is possible that these prices may go higher, and farmers in Alberta, are urged

to make their application for seed oats at once, as a large number of enquiries for these oats is being received from outside the province and the government is anxious that Alberta farmers have the first opportunity of securing them.

The ladies of the Chinook Women's Institute will serve lunch after the concert in the School on Friday evening.

Why Boys Leave The Farm

The question suggested by the above heading has been the subject of countless discussions, debates, newspaper and magazine articles. It has never been satisfactorily answered, nor has the problem itself been solved. As a matter of fact no completely satisfactory answer can be given because the reasons why boys leave their farm homes are as varied as the characters of the boys and the farms from which they come.

Although no one general reason can be advanced for boys leaving the farms, it is nevertheless well that continued attention should be devoted to the subject. To some extent the subject should receive community attention, but more particularly it is one to be studied and the problem solved by the parents of the boys. As has already been stated, what influences one boy to leave the farm does not make any appeal whatever to another boy. In the case of the second boy the urge to go arises from some entirely different cause.

If a boy on the home farm is becoming restless, losing interest in the farm, becoming discontented and unhappy, it is inevitable that sooner or later he will leave unless the reason for his dissatisfaction is learned, and, if possible, removed. Because father and mother have been satisfied to remain on the farm is no reason in itself why son or daughter should be content to do so. The important thing is to develop a keen desire for farming and farm life.

Among the reasons usually advanced why the boys—and girls, too—leave the farm are the attractions offered by the bright lights, the amusements, the companionship of the élites. Undoubtedly they have their drawing power, although, all too frequently, they prove willy-nilly the whipe. Again, the short hours of work in city offices, shops, and factories make strong appeal to the farm lad who has a continual round of chores and tasks from dawn to dark. City work appeals to him as easier, more pleasant, and as offering greater opportunities for advancement and culture. Too often the boy feels that he is merely a hired man on the farm instead of a partner in a family enterprise. The present is not satisfactory to him while the future holds out no great promise of anything better.

Then there is, of course, those boys to whom farm life does not appeal, but who have a real yearning to become doctors, lawyers, teachers, mechanics, business executives. On the farm they are, and always would be, square pegs in round holes, just as there are city residents who yearn for the land. It seems to be easier, however, for the farm boy to drift into a city job than it is for the city man to establish himself in rural life.

But is there not another aspect of this question to which too little attention has been given in the past? Is it not a fact that farmers do not "magnify their calling" as they ought to do? Recently a farm boy wrote an article on this much discussed question as to why boys leave the farm, and this boy's views are worthy of serious consideration by farmer's and farmer's wives. He asked what encouragement there was for boys to remain on the farm when their fathers and mothers were continually crying down the farm and its work. Instead of helping to keep their boys on the farm such tactics simply drive them away.

Further, this boy's observation led him to the conclusion that many farmers only provided full educational facilities for those of their children who were going into some other occupation than farming, and that the boy who was willing to stay with the farm was only given as much schooling as the law insisted upon. In other words, the boy who elected to stay with the farm was denied those advantages and privileges of self improvement granted to those who had determined to leave the farm and go into other lines of work.

It is not denied that many farmers have had hard struggles and many discouragements, but constant dwelling upon them does not help to better conditions, nor is it calculated to inspire the children to remain with the farm. And if many of these farmers could fully realize the struggles and discouragements of thousands of unemployed in the cities, and of the fear ever present with other thousands that they may be "laid off" next week or next month, they would get a true perspective of their own situation.

It cannot be expected that a high spirited ambitious boy looking forward on life is going to stay with the farm if his parents are constantly running it down. Such a boy inescapably makes up his mind that his home is going to be different, that when he marries he is not going to condemn his wife to a life of which he hears his father and mother make constant complaint.

After all, it is not so much the isolation of rural life—which is largely passing with the advent of the rural telephone, radio and the motor car—not the long hours of work, nor even the disappointments which some seasons bring, that causes many boys and girls to leave the farm. Rather it is the atmosphere of the farm home and the fact that its disadvantages and disengagements are dwelt upon so much and silence maintained regarding its undoubted advantages in so many ways over city life.

If in those farm homes where a feeling of gloom and a complaining spirit has developed, these tendencies were relegated to the background, and the boy who elects to stay with the farm was given equal advantages with the others, it is probable that more boys would choose to stay with the farm.

Recreation Park for Winnipeg
Construction operations on what engineers claim will be the finest recreation park in the whole of Canada, will start in Winnipeg early this spring, promoters of the project announced. The contract has been awarded to A. J. Cudman, of Vancouver, B.C. The park, which will cost approximately \$150,000, will provide facilities for every branch of athletics and sport.

To Investigate Tax Collection
A motion to renew the authority given to the common committee on public accounts last year, to investigate the method by which business profits and income taxes are collected in Canada, was made in the House of Commons by W. G. Good (Progressive, Brant). On request of the acting minister of finance the motion was allowed to stand on the order paper until a future date.

Testing Lignite In Europe

Saskatchewan Product Goes to Germany To Be Briquetted

Practical tests of briquetting Saskatchewan lignite coal are to be made in Germany and Czechoslovakia.

It is expected that the tests will take between six and eight weeks and that the results will be known in time to permit of the remodeling of the Blawat plant in June if the tests prove as successful as anticipated.

Fifty tons of the Blawat product were shipped in barrels to St. John's in two carloads. The coal was loaded into a steamer for Rotterdam and will be tested under the Staines and Thysen systems in Germany, and the Brifeld-Danek system in Czechoslovakia.

Investigations carried out over several months have led the practical interests considering the taking over of the Blawat plant to the conclusion that the three systems mentioned above are the most modern and practical.

Drives Out Rheumatism Subdues Lumbago

Brings Ease and Comfort to the Sufferer at Once

NERVILINE

A King Over Pain

These, who seek permanent relief from the grinding pain of Rheumatism and Lumbago should read the letter of F. E. Normand, from Georgetown, who writes:

"I was fully crippled with aching joints and Rheumatism. Nerviline must have been what I needed, because it cleared up my trouble quickly."

"If you need a reliable, strong, pain-relieving medicine, you can today, get a 25c bottle of Nerviline today; it will make you well quickly.

Another Warning Against White Bread

Professor Says Appendicitis Is Traceable to This Food

Mrs. Neville Chamberlain, wife of the minister of health, who was present at a lecture on "Diseases Caused by Badly Chosen Diet," given before the People's League of Health in London, advocated the use of wholemeal flour.

She said that she had always given her own children wholemeal bread.

The lecture was delivered by Professor R. H. A. Pilman, who said that the spread of the dread malady known as beri-beri was proved to be largely, due, as far as the white race were concerned, to the consumption of white bread, and the increasing prevalence of appendicitis in late years was traceable to the same source.

HEART WAS WEAK NERVES ALL GONE

Mrs. J. H. Hallenbeck, 117½ Welland Avenue, St. Catharines, Ont., writes:—"I was in a gas explosion with a weak heart, and my nerves were all gone. I suffered everything; couldn't sleep, or endure any excitement, and when left alone I felt as if I could scream. I took dizzy spells, often falling and bruising myself. My mother read about your Milburn's Heart and Nerve Pills, and bought me a box. I began taking them in different kinds of intervals, and soon found that I did not have any confidence in any of them. I took one box of H. & N. Pills, and felt so much better I concluded with them until I had used five boxes, and after I had taken them I did not need any more. I cannot praise them enough, Milburn's Heart and Nerve Pills too highly after all they have done for me."

Put up only by The T. Milburn Co., Limited, Toronto, Ont.

To Enforce Game Laws
Britain Receives Substantial Income From Foreign Investments

The British board of trade issued an estimate the other day that that part of the national income which is earned abroad. The earnings for British investments in foreign countries are put down at slightly more than one billion dollars. If the average interest rate was 5 per cent., the investments must have mounted to nearly eighteen billion dollars. The busted British seems to have saved a bit from the wreck. You have to hand it to John Bull. He has a way of looking out for himself.—Kansas City Star.

Finances In Good Shape

The British board of trade issued an estimate the other day that that part of the national income which is earned abroad. The earnings for British investments in foreign countries are put down at slightly more than one billion dollars. If the average interest rate was 5 per cent., the investments must have mounted to nearly eighteen billion dollars. The busted British seems to have saved a bit from the wreck. You have to hand it to John Bull. He has a way of looking out for himself.—Kansas City Star.

Good Price For Land

A price of \$32 an acre for a farm near Claresholm, Alberta, was reported in a sale made recently. This is the highest price paid in that district for some years, according to the Lethbridge Herald.

Latvia has only 201 miles of railroad.

Chicago has more snow than Kotlikan, Alaska.

Camp Craft Secrets

New Booklets of Canadian National Railways Gives Useful Hints to Fishermen, Campers and Sportsmen

The out-of-doors appeals to all Canadians and few countries in the world have been favored in the matter of holiday places. In every province are magnificent fishing streams and lakes, hunting or camping grounds. In many cases, however, the novice about to start out for a holiday in that out-of-doors wonders just what provision he should make in the way of clothing and outfit, and also what food supplies, bedding, etc., he is likely to need. To meet the requirements of such Canadians, planning for outings in the lake, river, or woods districts of the Dominion, a splendid hook, etc., "Camp Craft and Woodlore," has been issued by the Canadian National Railways and is being placed in the hands of ticket agents for distribution.

"Camp Craft and Woodlore" is dedicated to those who would answer the call of the open, according to the foreword of this booklet. In it are found many helpful hints gleaned from the experience and learning of years and related in the hope that their telling may widen the appeal of Canada's great natural playgrounds and add to the numbers who have discovered their charm and delight.

The booklet gives the prospective camper information on what to wear; how to care for equipment; what to eat; how to locate camp sites and how to sleep well. Health instructions and first aid accidents are given prominence, as also are weather signs, camp variabilities, and instructions on what to do when "lost in the woods." Altogether, the prospective camper will find this booklet one of the most valuable that has yet been placed at his disposal.

A Corrector of Pulmonary Troubles
Many testimonials could be presented showing the great efficacy of Dr. Thomas' Eclectic Oil in correcting pulmonary troubles. It is the best oil for the best testimonial its experience, and the oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will allay inflammation in the bronchial tubes.

Pacific Means Peace

The Natural Barrier Separating Japan From United States

Our navy could not cross the Pacific and successfully wage war, says General Mitchell in defending his air service ideas. If that is the case, it must be equally true that the smaller Japanese navy could not cross the Pacific and successfully wage war, is not that about as near to an ideal situation as we could get? If neither navy could cross the Pacific and successfully wage war, the preservation of peace becomes a practical military necessity on both sides, does it not mean that we want? Were not the naval limitation treaties designed to produce just such a balance as that?—Buffalo Express.

Many have been relieved of copious by Holloway's Corn Remover. It has a power of its own that will be found effective.

A doctor applicant declares that she lost her husband eight years ago in a dental hobby. He's probably still standing where she said she'd meet him in 15 minutes.

W. IRVING HASKETT, Hope Bldg.,
19 Elgin St., Ottawa, Ont.

Copyright, 1922, by Rafael Sabatini
"CAPTAIN BLOOD," a Vitagraph picture with J. Warren Kerrigan
in the title role, is an adaptation of this thrilling novel.

SYNOPSIS

Peter Blood, a rebel-convict under King James, becomes a buccaneer with headquarters at Tortuga. He is in love with Arabella, a widow he has rescued. Madeline d'Oreson, daughter of the governor of Tortuga from Le-vassor, a French ruffian. This insures him ships and men for his enterprise. King James sends to the West Indies. Lord Julian, his brother, on an embassy to make peace with piracy; Arabella is on the same ship, the Royal Mary.

CHAPTER XVI.—Continued)

She had turned to face him. She was pale to the lips, and her hazel eyes were blazing, as she cut into his apology for Blood.

"They must, indeed, if his other associates allowed him to live after that."

"Oh, the thing was done in fair fight, I am told."

"Who told you?"

"A man who sailed with them, a Frenchman named Calusac, whom I found in a waterside tavern in St. Nicholas. He was Levescar's lieutenant, and he was present on the island where the thing happened, and when Levescar was killed."

"And the girl? Did he say the girl was present, too?"

"Yes. She was a witness of the encounter. Blood carried her off when he had disposed of his brother-buccaneer."

"And the dead man's followers allowed it?" He caught the note of incredulity in her voice, but missed the note of relief with which it was blent. "Oh, I don't believe the tale. I won't believe it!"

"I honor you for that, Miss Bishop. I strained my own belief that men should be so callous, until this Calusac afforded me the explanation. Blood purchased their consent, and his right to carry the girl off. He paid them in pearls that were worth more than twenty thousand pieces of eight." His lordship laughed again with a touch of contempt. "A hand some price!"

"Your Calusac seems to have been accurate enough. Alas!"

"You are sorry, then?"

"As we are sorry to hear of the death of one we have esteemed. Once I held him in regard for an unfortunate but worthy gentleman. Now—such a man is best forgotten."

And upon that she passed at once to speak of other things.

The friendship which it was her great gift to command in all she met grew steadily between those two in the little time remaining, until the event itself that marred what was promising to be the pleasantest stage of his lordship's voyage.

The marquis was the mad-don Spanish admiral, whom they encountered on the second day out, half-way across the Gulf of Guanavas. A shot from the Milagrosa got among some

powder stored in the Royal Mary's forecastle and blew up half the ship almost before the fight had started; King James, became a buccaneer with headquarters at Tortuga. He is in love with Arabella, a widow he has rescued. Madeline d'Oreson, daughter of the governor of Tortuga from Le-vassor, a French ruffian. This insures him ships and men for his enterprise.

King James sends to the West Indies. Lord Julian, his brother, on an

embassy to make peace with piracy; Arabella is on the same ship, the Royal Mary.

then, restrained, perhaps, by the very words that had cloaked the retorting insult, he turned on his heel abruptly, and went out without answering.

The Milagrosa, with her consort, the Milagrosa, rolling after her, steered a south by westerly course, then veered to the southeast, round Cape Tiburon, and thereafter, standing well out to sea, with the land no more than a cloudy outline to harbored, she headed directly east, and so ran straight into the arms of Captain Blood, who was making for the Windward Passage. That happened early on the following morning. After having systematically hunted his enemy in vain for a year, Don Miguel chanced upon him in this unexpected and entirely fortuitous fashion. It was also the way of Fortune that Don Miguel should thus come upon the Arabella at a time when, separated from the rest of the fleet, she was alone and at a disadvantage. It looked to Don Miguel as if the luck which so long had been on Blood's side had at last turned in his own favor.

Misspelled Words Are Inexcusable

Careful Correspondents Will Conclude Dictionary If in Doubt

Good spellers are born and made. It is rather taken for granted that one spells accurately. A letter with misspelled words is quite inexcusable. It indicates indecision because no one need misspell a word if he will take the trouble to look it up. There are many careful correspondents who are not naturally good spellers who keep a dictionary close at hand for that very reason.

It is probably true that our grandparents were better spellers than we are. They were drilled in the old-fashioned way, being obliged to stand up and spell before the whole school.

"Headmarks" in the spelling classes counted those days and if a boy or girl spelled "Hemorrhage" with one "r" the chances were they never forgot that is the way not to spell it.

The old-fashioned spelling-bee has much to commend it. It is good discipline with a lot of fun to hold—dictation News.

Measuring Size Of Raindrops

Experts Discover They Are Larger In Summer Than Winter

Weather experts once set upon the laborious task of measuring the dimensions of raindrops, and found that the largest were about one-sixth of an inch and the smallest one-five-hundredth of an inch in diameter. An interesting fact which was discovered was that raindrops are larger in summer than in winter, and larger in hot than in cold climates. At the moment of condensation of the water vapor to the liquid state, green numbers of extremely small drops are formed close together. As they fall they merge, and thus what we call raindrops are formed. The size of the drop when it reaches the earth depends upon the height from which it has fallen. Now, in summer, the air is warmer than in winter, and, therefore, clouds are formed at a greater height, where conditions are favorable for rapid condensation.

What Advertising Means

A Good Definition of Advertising in Condensed Form

"Advertising—the force which enables the modern business man to disregard the distance between himself and his prospective customers."

"The force which gives him a million eloquent tongues with which to tell his business story to the world."

"The force which enables him to create new desires and to point out new ways of supplying old needs."

"The force, which, properly directed, will make a worthy business prosper, but which, no matter how cleverly applied, cannot give permanence to an enterprise founded on falsehood."

"The force by which a business may be built or wrecked, and, which, in the last analysis, brings to him who uses it just that measure of success that his efforts deserve."

—
Expressing Conditions

Doctor—"Your trouble is dyspepsia; should laugh heartily before and after your meals."

Patient—"Impossible, doctor, I cook them myself and then I wash the dishes."

Force of Habit

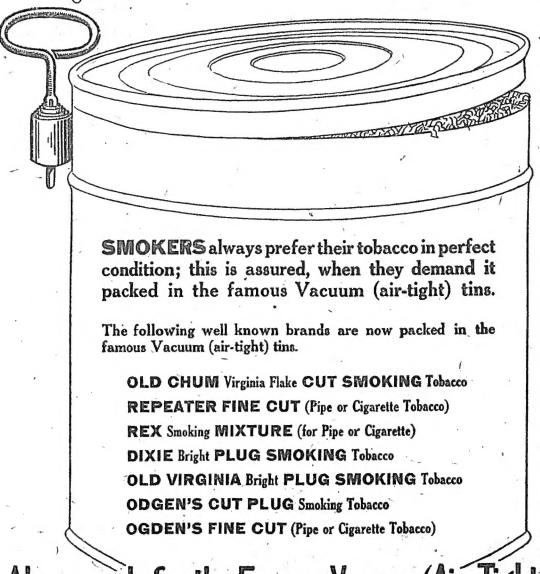

Kuhn—"How did Harry happen to lose control of his car at the railroad crossing?"

Frey—"He's the kind of a man who always drops everything when the whistle blows."

Attend to trifles today. The more important matters will come in due time.

Four and one-half tons of oak timber make a ton of charcoal, while white pine timber six tons are required.

Something New!

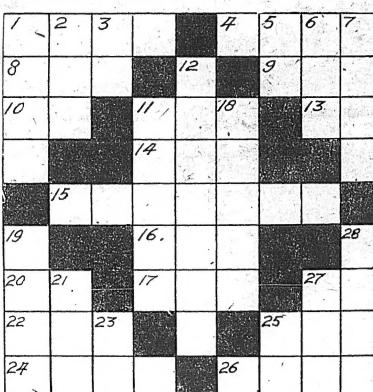

SMOKERS always prefer their tobacco in perfect condition; this is assured, when they demand it packed in the famous Vacuum (air-tight) tins.

The following well known brands are now packed in the famous Vacuum (air-tight) tins.

OLD CHUM Virginia Flake CUT SMOKING Tobacco
REPEATER FINE CUT (Pipe or Cigarette Tobacco)
REX Smoking MIXTURE (for Pipe or Cigarette)
DIXIE Bright PLUG SMOKING Tobacco
OLD VIRGINIA Bright PLUG SMOKING Tobacco
ODGEN'S CUT PLUG Smoking Tobacco
ODGEN'S FINE CUT (Pipe or Cigarette Tobacco)

Always ask for the Famous Vacuum (Air-Tight) Tin

OUR CROSSWORD PUZZLE

- 3 University degree (ab.).
- 4 Abbreviation for Anglo-Saxon.
- 5 A popular beverage.
- 6 Despatched.
- 7 A pronoun.

Proof Of Radio Value

Raising Funds Quickly For Relief of Tornado Victims

A striking commentary on the value of radio broadcasting as a means of reaching the great bulk of the people was heard over local radio sets when Station WLS, Chicago, announced that \$13,000 had been raised by that station in aid of the hundreds rendered homeless by the recent tornado in Illinois, Indiana, Iowa, Missouri and Kentucky.

Other radio stations in the United States have been taking up the cause of the homeless people who were caught by the twister, but as yet the Chicago station leads in the matter of funds raised.

Consider your own faults and you will have less to say about the faults of others.

The secret of making English bank note paper has been kept for 200 years.

BURNS!

Mrs. Minard's with sweet oil and apply at once. It removes inflammation, stops the pain and heals quickly.

Keep a supply in your pantry

For Rainy Days

CLOSE DIVISION IS LOOKED FOR ON THE BUDGET

Ottawa.—Presentation of the Progressive sub-amendment to the budget has set political gossip agog with speculation as to the government majority on the budget. Two years ago, Robert Forke, Progressive leader, presented an amendment along similar lines. It was voted down by a combined vote of Liberals and Conservatives. But then came the main government motion on the budget, and Conservatives and the great majority of Progressives found themselves arrayed together against it. The result was that the budget only carried with a majority of eight.

The view prevails in political circles that a similar situation is now practically inevitable. The Conservative amendment—which still stands—will, it is expected, be voted down by a combined vote of Liberals and Progressives. But afterwards will come the main government motion. On this, such is the view expressed, Conservatives and Progressives will again vote in the negative.

In previous close divisions the government has always found a certain measure of support to the left of the speaker. But the general impression is that the government majority will be small.

Predicts Aerial Warfare

Sir Chas. Higham Says Britain Will Never Again Fight Aggressive War

Chicago.—The next war will be fought in the air some twenty years hence, Sir Charles Higham, English advertising man, declared in addressing the English Speaking Union. Chicago will be in as great danger of destruction by aerial bombs as New York or San Francisco, he declared.

Britain and the United States never will oppose one another in war and Britain never will fight an aggressive war again. Britain, he said, "is the policeman of the world and is interested only in stopping any aggression on any part of the English-speaking race by another nation, whatever its color."

France, he said, has the greatest army on earth, and with an air force equalled by none could, "with the forces and weapons at their disposal, wipe out London from the air within four hours."

He said he did not seek to be an alarmist and was speaking for himself.

Manitoba Loss Heavy On Outstanding Loans

Report States 449 Borrowers Have Abandoned Their Farms

Winnipeg.—The Provincial Government confesses a loss of \$669,202 on outstanding loans, aggregating \$2,442,100, to the 71 rural credit societies in Manitoba. This represents an estimated addition of \$32,137 to the already recognized loss of \$32,066.

A report tabled in the legislature by Premier John Bracken shows that borrowers numbered 3,065 of whom 49 have abandoned their farms. Forty-four societies are now being handled by the official administrator of the province.

Free Radio Music

Ottawa.—"Why should radio broadcasting receive treatment different from that accorded to the press, the pulpit and the stage?" This question was put to the copyright committee of the house by Gordon V. Thompson, of Leo Feist, music publishers, Toronto, who maintained that full copyright control should be exercised by Canadian authors and song writers in Canada. He opposed the broadcasting of "free music."

Treaty Is Approved

The Hague.—The second chamber has approved the trade treaty between Holland and Canada.

Manitoba Pool Elevators Seeking Incorporation

Winnipeg.—A bill to incorporate the Manitoba Pool Elevators, with a capital stock of \$1,000,000, was ordered reported by the private bills committee of the Manitoba Legislature. The company, under the bill, is seeking authority to construct or acquire facilities for handling grain for the Manitoba Co-operative Wheat Producers, Limited, and its members. It aims to improve methods and reduce the cost of handling grain and to curtail speculation, manipulation and waste in the process.

Ukrainians Face Starvation

Reports From Komarovo District, Manitoba, Have Been Confirmed Winnipger.—The Canadian Hanok, Ukrainian language paper, says:

"We have certain evidence that the poverty of the Ukrainian farmers north of Komarovo is terrible and that, if there is no prompt action, dozens will perish of hunger."

The paper states that several families are living on the charity of the municipality and that when present supplies are exhausted, "death awaits them."

Dr. J. A. Hunter, Teulon, who has worked for the Presbyterian Church among the Ukrainians of the Komarovo district for 20 years, said that he believed the relief to be correct. All crops and garden produce in the district was destroyed by frost last year, and the people had no means of support.

Says Oriental Labor Retards B.C. Prosperity

Delegates Claim Wages Paid Do Not Circulate Amongst White Population

Victoria, B.C.—One hundred and forty-one delegates representing 80 different associations and societies, met here recently and discussed the Oriental problem in British Columbia and means for its solution. Speakers declared that Oriental labor had been a great influence in retarding prosperity in the province, as money paid to Orientals was lost to circulation amongst the white population. It was declared that the lumber industry payroll last year was \$50,000,000 and that one-half of the amount was paid out to Orientals.

Eight Killed In Explosion

Oil Lighter Blows Up In Harbor At Hamburg

Hamburg, Germany.—Eight persons were killed, and three others seriously injured, when a heavy explosion occurred on the oil lighter Saturn, in the harbor here.

The force of the explosion tore apart the lighter, a vessel 210 feet long, hurled her anchor, weighing more than 400 pounds, over several nearby buildings, and blew the body of one of the workers aboard the ship to the roof of an adjacent house. The explosion is believed to have been due to gases formed by the residue of oil on the lighter, which exploded when the worker started an oxygen blast apparatus.

Australia Plans Own Defence

Unwilling to Allow British People to Bear Burden

Adelaide, South Australia.—Speaking here, Premier Stanley Bruce declared the defence ideal of the Commonwealth was a squadron of 10,000 cruisers, with submarines. He asserted that Great Britain had assisted Australia to keep away a possible hostile navy, but that Australia could not allow the heavily burdened people of Britain to bear all the burdens of Australian defence.

"Save the Forest" Week

Ottawa.—The completion of a Dominion-wide organization in connection with the observance of a "Save the Forest" week, April 19 to 25, was effected at the conference called by Hon. Charles Stewart, minister of the interior.

Western Nurses Graduate

Montreal.—Four western nurses are included in the 1925 graduating class of nurses in training at the Royal Victoria Hospital here. The western nurses are: Jean Scott, Winnipeg; Man, Gweneth Nixon, Battleford, Sask.; Agnes Bigelow, Regina, Sask.; Lillian Greene, Medicine Hat, Alta.

Orders Two Submarines

Melbourne.—It was announced here that the Commonwealth Government has ordered two submarines to be constructed by Vickers, Limited, England, at a total cost of £216,000.

Trouble In Balkan States

Seizure of Airplane Pilot With Maps Causes Suspicion

Vienna.—Bulgaria and Jugoslavia are on the verge of a wordy diplomatic war, symptomatic of the suspicious atmosphere of the Balkans.

Dispatches from Belgrade say that a Bulgarian airplane has been seized in Jugoslav territory, and that photographs of Jugoslav frontier fortifications were found in it. The pilot and passenger, the Bulgarians report asserts, were Bulgarian officers.

Bulgaria insists that the plane was privately owned, and that its pilot and passenger have no official status. The men probably will be tried by a Jugoslav court martial.

Raise More Sheep

Canadian Manufacturers Emphasize the Importance of the Woolen Industry

Toronto.—To induce the Canadian farmer to raise more sheep, the Canadian manufacturer to use more Canadian wool, and the Canadian consumer to wear more Canadian woolen goods—is the three-fold objective of the convention of Canadian Woolen and Knit Goods Manufacturers, which opened here.

In his annual address, President Dobbie laid emphasis on the importance of the woolen industry to Canada, and urged the necessity for safeguarding this industry in every way.

EASTERN CANADA FAVORS THE NEW TAX REGULATIONS

Montreal—"The tax on the generation of electrical power will certainly, I should think, have the effect of discouraging Americans from tampering with Canada's natural resources," J. S. Norris, vice-president and general manager of the Montreal Light, Heat and Power Company, declared, discussing the provisions of this year's budget. Mr. Norris did not think American consumers would be so nervous as to get Canadian hydro-electric power with the added tax. Asked whether he considered this was a good thing for Canada, he replied: "Yes, I do."

Governwood, assistance to cooking plans, which are expected to be established at strategical points, is not likely to make any difference in Canadian Pacific Railway freight rates on coal shipments from mines either in the east or in the west. A statement was made by Z. N. Todd, freight traffic manager of the Canadian Pacific Railway, that the rate for carrying coal was now at a point where it could not be lowered, and that no change was contemplated.

At the offices of the Canadian National Railway, it was stated that no comment could be made until the budget had been studied.

Strike Among Arab Students

Resort Opening of Hebrew University in Jerusalem

Jerusalem.—The students in the men's training college here struck in connection with the impending visit of the Earl of Balfour, who is to open the Hebrew University. A general strike movement among the Arabs has been decided upon in protest against the appearance of Lord Balfour, author of the Balfour declaration, setting forth the British policy to encourage development of the Jewish home in Palestine.

U.S. Battle Fleet Practice

San Pedro, Cal.—The most powerful of the floating sea fortresses of the United States 11 dreadnaughts recently hoisted their flag of flame and steel unlike anything ever before unloosed on the Pacific Ocean. For six minutes they beat battle fleet rent the air with appalling vibrations in its annual force practice simulating a terrific naval battle.

Will Consider Egg Question

Ottawa.—What Canada proposes to do to meet alleged competition, created by Chinese and United States eggs in the Canadian market, is the basis of a series of questions to be asked in the House of Commons shortly by W. G. McQuarrie, Conservative, New Westminster, B.C.

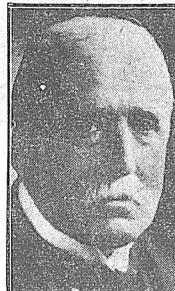

Tuberculosis in Japan

Tokio.—An official report states that tuberculosis is increasing yearly in Japan. There are now 4,300,000 sufferers from the disease, with about 12,000 deaths a year.

Egypt Acts Independently

Paris.—Although Great Britain is supposed to control Cairo's foreign policy, independent action by the Egyptian Government has developed.

Meets Grave Crisis

THE EARL OF YPRES

formerly Field Marshal Sir John French, who underwent a severe operation recently.

Help For Canadian Veterans In U.S.

Relief Will Be Given Through American Red Cross

Ottawa.—No special provision is made for the relief of disabled or distressed veterans of the American Expeditionary Force, now resident in Canada, it was stated in the House of Commons by the minister of soldiers' civil re-establishment, Hon. Dr. H. S. Beland.

The question came up during the discussion of proposed legislation to dispose of the surplus profits from the canteens of the Canadian Expeditionary Force during the war. These have been held in trust by the government.

Mr. Beland stated that a sum, not yet specified, would be allotted to the American Red Cross for the relief of members of the Canadian Expeditionary Force resident in the United States.

Report On Resources Ready To Alberta Is Finished

Edmonton.—Premier Greenfield is in receipt of advice from R. C. Hon. Mackenzie King, that the report of M. Biggar on the transfer of Alberta's natural resources, has just been submitted; and is ready for consideration.

M. Biggar has been making an investigation into the matter since the last conference between the two premiers in Ottawa, the points particularly in question being some technical features of the accounting already made. It was understood that the federal authorities would not be ready to go on with the actual consummation of the transfer, as agreed upon between the governments, until this inquiry had been completed and reported.

Seafish Catch Much Smaller

Both Atlantic and Pacific Coasts Report Considerable Decrease

Ottawa.—The total catch of seafish on both coasts of Canada during February, was 40,178,000 pounds, valued at \$634,549, as compared with 45,283,700 pounds, valued at \$1,209,741 during February, 1924. On the Atlantic coast, the total catch of cod, haddock, hake and pollock was 3,762,400 pounds, compared with 4,218,400 pounds in the preceding February.

The total catch since the commencement of the lobster fishing was 540,000 pounds, compared with 404,900 pounds in the preceding season.

On the Pacific coast, the catch totalled 980,300 pounds, as compared with 1,752,700 pounds in February, 1924.

For Drug Victims

Whinipeg.—A bill to provide for compulsory treatment of drug addicts in the province was referred to the law amendments committee by the legislature. It was introduced by Hon. D. L. McLeod, municipal commissioner. W. Ivans, Labor, told the members he considered the bill a step toward the solution of the drug problem.

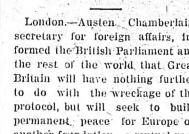

Germans Threaten Poles

Warsaw.—In pursuance with the German-Polish convention signed at Vienna last August the German Government has invited persons domiciled in Germany who declared their preference for Polish nationality to leave German territory before August 1 next with the alternative of expulsion by force.

Old Age Pensions

Ottawa.—The further consideration of old age pensions schemes is advocated by Hon. James Murdoch, minister of labor. In a resolution which he will propose in the House of Commons shortly.

British Nation's Plan For Permanent Peace

LONDON.—Austen Chamberlain, secretary for foreign affairs, informed the British Parliament and the rest of the world that Great Britain will have nothing further to do with the wreckage of the protocol, but will work to build permanent peace for Europe on another foundation—a mutual pact between Germany and her late allied enemies. This pact would guarantee the present frontiers of Western Europe against change, and in it Germany would renounce all idea of ever going to war to bring about a settlement in her eastern borders as they were fixed after the last war.

Offer Children As Sacrifice to Goddess

Father and Sons in Calcutta Sentenced to Death for Crime

LONDON.—Disputes from Caledonia report an amazing case of the sacrifice of children to the goddess Kali, at Mandia, near Jalapalur, in the central provinces.

The young son of a former government official, named Mukund, fell sick, and the family, believing the boy possessed of a devil, decided human sacrifice necessary to his recovery, and offered up his sister as this sacrifice. When no improvement in the boy's condition was forthcoming, they deprived him of food, and bound him naked near a holy place, where he died from exposure.

Mukund and two sons have been sentenced to death for the crime, and a daughter-in-law to imprisonment for life.

Plan For Franco-Turk Alliance

French Expert Now in Turkey On Pact Business

Constantinople.—Henri Franklin Bouillon, the French expert on Turkish affairs, is now in Turkey, trying to establish a basis for an alliance between Turkey and France. As the Mosul question is coming up in the spring for settlement, and as Turkey may need arms and credit as well as diplomatic support at Geneva, Paris has decided the time is ripe to try to settle outstanding questions with Turkey and to make a close accord.

Receives Threatening Letters

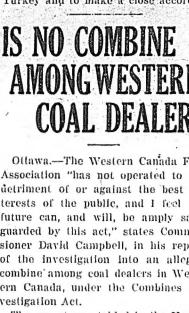

Labor Member Who Attacked Prince Receives Police Protection

LONDON.—The Daily Mail says that David Kirkwood, Laborite Member of Parliament, has received so many threatening letters, in consequence of his attacks upon the Prince of Wales, the House of Commons and elsewhere, that the Glasgow branch of the National Union of Railwaysmen, has taken up the matter with the home secretary. The latter is said to have promised Mr. Kirkwood full investigation of the threats and to have offered him police protection, which he had refused.

Canada's Best Auto Customer

Ottawa.—Canada's exports of automobiles continues to increase, and New Zealand is the Dominion's best customer for such vehicles. Last month, a total of 4,008 passenger autos, valued at \$1,432,551 were exported, and of these, New Zealand took 1,114.

Tells Why He Can Now Eat Hearty

"A letter which I read in the paper about Carter's Little Liver Pills fitted my own case so closely that I could not help trying them and am very happy I did," So writes Mr. Frank J. Treadwell of New York, N.Y., whose letter goes on to say, "I had heard about Carter's Little Liver Pills for years but never knew they helped overcome poor appetite and sour stomach, until a friend who took Carter's with good results, I tried them and can honestly say that they freed me of nasty gas on stomach, so that I can eat hearty again."

And, realizing the efficacy of the Combines Investigation Act, and its protection being so easily accessible to rich and poor alike, one can rest quite content as to what may happen in the future."

Pasteurization of Milk

Calgary.—The legislative committee of the city council, after hearing arguments for and against, decided not to recommend a bylaw for the compulsory pasteurization of milk sold in the city, on the grounds, that it would work a hardship to small vendors.

Eighty-five per cent of the milk sold in the city by larger firms at present is pasteurized.

Earl Balfour's Visit

Jerusalem.—The visit here of the Earl of Balfour, former British foreign secretary, passed without incident. Crowds gathered in the mosques, and were addressed by Moslem and Christian orators. Mounted police patrolled the streets, but there was a marked absence of tension.

Recommended and for sale by all drug stores

PUBLIC MEN OF MOTHER COUNTRY MAY VISIT HERE

LONDON.—Warm commendation of the interchange of visits between the public men of the mother country and the dominions was expressed by Premier Stanley Baldwin, speaking at the annual meeting of the Empire Parliamentary Association.

The prosperity of each unit of the Empire depended upon the prosperity of the motherland, he declared, speaking of the success of the visit of J. H. Thomas, and other ministers of the Labor Government to South Africa recently. He hoped it would be possible to arrange that a delegation go to Australia next year.

He foreshadowed a rearrangement of parliamentary business to enable members to have a long vacation, perhaps from August to January. The premier also hoped to make arrangements enabling the colonial secretary, H. C. Abery, to visit the dominions during his term of office.

Encouraging Immigration Figures

Many Canadians Are Returning From the United States

Ottawa.—Immigration to Canada during February amounted to 2,210, an increase of 203 over the previous month, according to an official statement by the department of immigration and colonization.

Of the arrivals, 542 were British, 800 from United States and 865 from other countries. Immigration from the United States shows an increase of 168 over January.

Canadians returning from the United States after having been in that country for six months or over, and declaring their intention of remaining permanently in Canada, totalled 2,012. Since the beginning of the fiscal year the number of such returning Canadians is 41,044.

Immigration for the 11 months of the fiscal year to February 28 has been 49,265 British, 14,521 from the United States, and 40,361 from other countries. Immigration from the United States shows an increase of 168 over January.

Agricultural Research

May Result in a Substantial Increase In the Nation's Wheat Yield

For the first time in the history of Canada, an announcement has been made that scientific research on the Dominion's experimental farms would probably result in a substantial increase in the nation's wheat yield. The announcement is made by F. S. Archibald, of Ottawa.

Canada's future as an agricultural nation rests entirely upon agricultural research.

The factor that gives Canada leadership in the world of wheat is the ability to produce a Number One hard product. Good flour cannot be made without a certain percentage of hard wheat.

So long as Canada can produce that hard wheat and other nations cannot produce it, this country's leadership is assured.

But, once Canadian soil loses the faculty of producing hard wheat or the soil of other countries is artificially endowed by science with that faculty, one of Canada's greatest economic weapons will be destroyed.—Vancouver Sun.

Clever Doctor But Poor Business Man

Rich American Astonished at Methods of English Specialist

Sir John Milton Davis, top King's Laryngologist, has been prominent these days in the daily bulletins about His Majesty's illness. Sir John is the throat specialist to whom singers go when they suffer a fever or feel a bit croaky-voiced. He knows the idiosyncrasies of every human neckline and how to deal with them. An American physician came to him once and presented a throat which the patient was certain was cancerous.

"Nothing wrong with it," said the specialist. "Just a trifling relaxed. You need more fresh air and less steam heat."

"What's your fee?" asked the patient.

"Five guineas."

"What would it have been if it had been cancer?" asked the astonished American.

"Five guineas."

"Well, all I can say, sir, is," answered the patient, "you may be a great doctor, but you are a rotten business man."

Thought Time Was Wasted

Boys Saw No Chance of Deliberate Workmen Breaking Plate Glass

A glass merchant's truck had drawn up at the curb and from it a gang of workmen were taking a big plate glass pane to be placed in the shop window. As carefully bearing the big pane they proceeded toward the window there gathered the usual crowd, including two small errand boys, who evinced much more interest in the proceedings than anyone else.

When fifteen minutes had passed one of the youths, growing weary of the extreme deliberation of the workmen with the glass, turned to his companion and said:

"We may as well be moving, Tom. They are not going to drop it."

Massive Piece of Work

Owing to the danger of collapse the roof of the famous old banqueting hall at Haddon Hall, England, the home of the Verons and Manners, has been taken down and a new one built. The roof is a massive piece of work, oak trees weighing 60 tons, on Lord Granby's Haddon estate, being used. The roof on the main portion of Haddon Hall is in a wonderful state of preservation.

May Join League

It is reported in League of Nations circles that German and Austrian agents are negotiating for a chateau on the lake front at Geneva for the use of a combined German and Austrian embassy to the league. This report is creating great interest, in view of the recent statement representing Germany as more favorably inclined toward joining the league.

When Saskatchewan Leads

Upwards of 15,000 horses were shipped from Western Canada to Eastern Canada in 1924, the bulk of those coming from the province of Saskatchewan, which is maintaining its lead as the greatest horse breeding province in the Dominion, with a total of 1,170,715 head, an increase of 25.41 over 1923.

Provides Trust Fund for Servants

Prince Roland Bonaparte's will provides a trust fund from which all his servants are to be paid their regular salaries for the rest of their lives. The Prince, a grandfather of Napoleon, became wealthy when he married the daughter of M. Blane, the enormous rich founder of Monte Carlo.

Suppression of the Cutworm

Poisoned Bait Will Prove Successful to Protect Gardens

The cutworm is no respecter of plant, soil or district. Its suppression is, therefore, a necessity everywhere and the method recommended by the Dominion entomologist is by poisoned bait composed as follows: 20 pounds of bran and half a pound of Paris green well mixed in a wash tub while dry, a quart of molasses dissolved in two to three gallons of water and the bran and poison thoroughly dampened therewith. For garden gardens can be used a quart of bran, a teaspoonful of Paris green and a tablespoonful of molasses with sufficient water to thoroughly moisten the bran. Shreds or muddings in place of bran can be used. In gardens containing rows of vegetables, advises the entomologist, the mixture should be scattered thinly along either side as soon as cutworm injury is noticed. In shrubs, evergreen plants can be protected by placing a small quantity of the poisoned bran around, but not touching, each plant. The bran should be scattered after sundown so that it will attract the pest when it comes out to feed at night. In small gardens, when cutworm injury is noticed, the worm can generally be located about an inch below the soil and within a few inches of the plant so that it can be destroyed by hand.

Rotation of Garden Crops

Should Be Rotated So That Soil May Have a Change

Rotation of garden crops is strongly advised by Messrs. MacKillop and Cooper, of Brandon, Man., experimental farm, in Bulletin 43 of the Dominion department of agriculture. They say where rainfall is light and space plentiful, good results will be obtained from summer-fallowing every second or third year. This means leaving one-third of the garden unused each season. If kept clean all the year this portion or section will be in perfect condition for seedling the following year. On the heavier soils, where a fair amount of moisture percolates and wide rows are used, the authors add, no advantage from summer-fallowing will be gained. Garden crops should be rotated so that the soil may get a change from one type to another. Peas and beans are different in their effect on the soil from the deep-rooted beets, carrots, etc. Wide-spreading vines, like melons and cucumbers, are a change from closely planted crops. Tomatoes and corn are also distinct types from the common vegetables. Thus these varying kinds offer ample opportunity for change of crops on each part of the garden.

Enriching Garden Soil

Well Rotted Manure is the Only Fertilizer Required

A dressing of barnyard manure to about one-half or one-third of the garden each year, is claimed by the superintendent and head gardener of the Dominion experimental farm at Brandon, Man., in their joint bulletin on prairie gardening to be advantageous. The manure should be thoroughly rotted before applying. Coarse straw manure opens and dries out the soil and is likely to bring in weed seeds. Manure that has been piled for at least a year, is heavy, solid, full of moisture, with the straw rotted and the weed seeds killed, is best for the garden. This should be applied evenly over the surface of the land and ploughed or dug in. Under special circumstances some benefit might be derived, say our authorities, from the use of special fertilizers, but if barnyard manure and good cultivation are made use of, the owner of the home garden may safely ignore commercial fertilizers.

Dairy Exports to Germany

In January of this year Canada exported 235,300 lbs. of butter and 112,700 lbs. of cheese to Germany, being more butter than to any other country. To Belgium in January, Canada exported 77,122 lbs. of butter and 301,800 lbs. of cheese, that country ranking second to Germany as regards butter and second to Great Britain as regards cheese.

Going After Smugglers

The Dominion Government will endeavor to assist the customs department in every possible way in the suppression of smuggling along the Canadian-United States border, Hon. J. A. Robb, acting minister of finance, told a delegation from the Canadian Association of Canadian Garment Manufacturers.

Couldn't Fool Her

Pop—"Just think, those ruins are 2,000 years old."

Mop—"Aw gwan, it's only 1925 now."

Many a man who wonders what his friends think about him would be surprised to learn they don't think at all.

Village Postman Is Puzzled

Families Have Similar Names and Houses Are Not Numbered

Some of the difficulties experienced by country doctors in keeping the record cards of patients are recounted by a well-known practitioner in the British Medical Journal. Among the men over 21 and the women over 20 in one small village there are: 62 Halls, 40 Bonds, 32 Giles, 22 Willis, 25 Smiths, etc.

Of the Halls, 4 have the Christian name of Samuel, 4 of Henry, 4 of Frederick, 3 of James, 3 of Frank and 3 of William.

None of the houses are numbered, which adds to the confusion. The doctor says:

"John Bond lives in one long unnumbered street and one of them is a postman. I asked him once, 'What do you do with a letter addressed simply John Bond, Broad Street?'

He said, "Well, I open it and read it myself first, and if there's no money or anything in it for me, I leave it at the house of the nearest John Bond."

This village is only one out of three in the doctor's panel practice. He has 153 patients named Hall,

Gathering Relics Of Pioneer Inventions

Some of Edison's Tools in Ford Museum at Detroit

Henry Ford has a museum in Detroit for which he is gathering relics of pioneer inventions. He recently bought at Fort Myers, Fla., the tools and laboratory equipment with which Mr. Edison experimented and brought to perfection many of the world's most wonderful inventions. Mr. Ford purchased the material from a blacksmith, who bought the priceless junk from Mr. Edison six or seven years ago, when he was working for the great inventor. It was in Fort Myers that Mr. Edison worked out a substitute for the old carbon filament then used in electric light bulbs. He also perfected the modern incandescent lamp there.

One Of Connor's Characters

"Boss of the Ottawa" in "The Man From Glen-Garry" is Dead

The "Boss of the Ottawa," Anthony Marsell, died March 16 at his home near Iroquois, Ont., aged 99 years. His death brought to a close a long life of hardship, adventure and romance among the lumbermen of the Ottawa river a century ago. He was the original character depicted by Ralph Connor in his book, "The Man From Glen-Garry," as the "Boss of the Ottawa."

Caenorhynchus Dies

Professor August Von Wassermann, 59, Director of the Kaiser Wilhelm Institute for Experimental Therapy and Professor of Internal Medicine at the University of Berlin, the originator of the celebrated Wassermann blood test, is dead.

Coal Found Under Busy Street

While laying a sewer, workmen discovered a seam of coal 35 ft. below a busy thoroughfare at Coalbridge, Lanarkshire. The coal is now being dug up, and nine to ten tons are carried away daily to the "pithead" in the middle of the street.

Any man may select his companion, but his relations are thrust upon him.

Public Opinion

Jalousies of Geography or Religion Should be Removed

"Public opinion is a creator, but it must know what it is creating. It is the duty of every member of a democracy to make himself competent to take part in public affairs."

These were the statements of H. E. Excellence, Lord Byng of Vimy, Governor-General of Canada, when he spoke on "Public Opinion" before a Canadian Club at luncheon in Toronto. The governor-general was greeted with great enthusiasm.

Public opinion must be inspired, but it could only make its presence felt when it represented the views of a large part of the people in all parts of the country, Lord Byng said.

"Public opinion must guide its leader or find itself under his heel," he said. "The country must be thought of as a whole, and the jealousies of provinces, nationalities, religions, and localities, obliterated from the mind in the consideration of the utilitarian point of view of the greatest good to the greatest number."

Restored To Throne By British Navy

Prince Will Hear Story of African King in Kenya

One Hundred Year Life Span Forecast

By Chicago Surgeon

The average length of life will reach 100 years by the year 2000, Dr. Gilbert Fitzpatrick, Chicago surgeon, declared yesterday. Life expectancy is steadily increasing, he said.

Dr. Fitzpatrick gave the following table on life expectancy: The average span of life in 1775 was twenty-seven years; 1815, thirty-seven years; 1825, fifty-seven years; 1875, eighty years; 2000, 100 years.

The big increase in life expectancy during the past fifty years can be traced to the "germ theory" of disease, Dr. Fitzpatrick said. Better control of diet, less crowding and other elements must enter before the 100-year stage is reached, Dr. Fitzpatrick declared. Ways and means must be found to keep the air pure, balance diets and reduce crowding. Periodical examinations by physicians are essential, he holds.

Had To Pay Old Debt

Australian Knew Car Driver Who Owed Bill For Years

A big car just managed to get up to a small store and filling station in a village near Sydney, Australia, as its gasoline supply was exhausted. The shopkeeper started to fill the tank and then suddenly stopped. He looked at the driver of the car for nearly a minute and then a warm argument followed. The driver of the car had left a bill at the store many years before and the shopkeeper refused to give him any gasoline until he paid it.

Shakespeare Provides Fire Slogans

Shakespearian Quotations are Used by the London Metropolitan Fire Brigade in an Effort to Caution the Public Against Carelessness Where Fires are Concerned

One quotation in particular, "A little fire is quickly trodden out, which before suffered rivers cannot quench," has been hung in the fire brigade headquarters in London and distributed to various fire prevention bureaus.

A Good Suggestion

A Scientific Worker has Recently Suggested that All Motor Gasoline be Colored red to Distinguish It from Other Fluids for Which It is Frequently Mistaken, Thus Causing Explosions, Fires and Sometimes Loss of Life.

New Zealand eats more raisins per capita than any other country, according to a statement issued by a raisin growers' organization at Fresno, Calif.

The Coal Deposits of Canada are Being Explored to Conserve About One-Seven of the Known Supplies of the Whole World.

Ninety-three and Still Plans Bridges

Experts Applaud English Engineer Who Gave Technical Address

Sir Bradford Leslie, the engineer, who will be 94 in August and only a year ago planned a new bridge across the Hooghly at Calcutta, gave a lecture at the Institution of Civil Engineers, Great George Street, London, S.W., before the Permanent Way Institution. Speaking in a firm voice, he did not hesitate over a single word in a speech full of technicalities. He produced from the platform two specimens of steel rail cast a foot long and many wooden models of older type rails and while speaking of their properties of weight-carrying and "non-conformability to the curvature of fish bars" held them up for inspection.

He turned to point to diagrams on a number of big charts hanging behind him, darting from one to the other without a second's hesitation. At last, when the younger experts gave him hearty applause for his thoroughly modern treatment of his subject, he reddened, murmured his thanks, and, with a smile, sat down after standing for more than 20 minutes on the platform.

No Place Like Canada

"World's Wheat Champion" Says It is Land of Promise

J. C. Mitchell, of Dauphin, Sask., styled by grain growers throughout the world as "the world's wheat champion," has returned from a three-month visit to England, the place of his birth. While in England, Mr. Mitchell, who has repeatedly won the world's prize for best wheat at the Chicago International hay and grain show, was born at Mosesley, near Manchester, Eng., he thinks there is no place like Canada.

"I am glad to get back to Canada, the land which brought me such high success," he said. "Canada is still the land of promise. 'Go west, young man, go west' should still be the motto of those who desire success, wealth and happiness."

Japanese Novel One of World's Greatest

Written in Old Japanese By Woman in 1004

A novel written in 1004 by a Japanese woman is being translated by a member of the staff of the British Museum. The novel is 500,000 words long, and is said to be one of the great novels of the world and the earliest long novel in any language. The work of translation began last March, and it is noted that the whole book will be translated in five years' time. Much of the work has necessitated research, as it is written in old Japanese, as unintelligible to the modern Japanese person as old English is to the average Briton. The novel was written by a woman named Murasaki in A.D. 1004, and has been read by few Europeans, although it is a common book in Japan. It has 800 characters, who have passed into legend. The story tell of the love affairs of Genji, a son of the Emperor.

French Dowagers Form Politeness League

Have Started Crusade Against Boorishness of Countrymen

Dowagers of the Faubourg St. Germain, the so-called haven of French aristocracy in Paris, have started a crusade against what they describe as the growing lack of politeness and boorishness of Frenchmen.

They have formed a "league of polite people," the rules of which were passed on over tea cups in one of the most prominent salons of Paris society. One member of the committee explained that since the war masculine contempt for the traditions of French courtesy had known no bounds and that the purpose of the new league is to organize leagues everywhere, with the view of recovering lost manners.

Seek International Protection For Birds

Britain Will Be Asked to Endorse Treaty With European Countries

International protection for migratory birds, so that it will be illegal to shoot or trap them in one country while the season is closed in another, has been endorsed by the public lands department in Sweden. The countries that will be asked to join in this agreement are Great Britain, the Netherlands, Germany, Belgium, Norway, Finland and Denmark. Without such a treaty there is danger that wild ducks, quail and other birds that fly south for the winter will be exterminated.

Final Financial Assistance For Highways

"There is to be no further financial assistance by the Federal Government to provincial administrations for the improvement of highways during the present session, other than a bill extending the time for two years to enable provinces to earn the money already voted," Hon. G. P. Graham, minister of railways, said in the house.

"No further legislation is proposed."

Our Heritage

Part II—By J. P. Watson, Chinook

The statement that perfection can not or could not create imperfection is one not readily understood by those who all their lifetime have taken their thinking second-hand. "There is a spirit in man, and the inspiration of the Almighty giveth him understanding," is a plain statement of truth, but the average man dare not trust the spirit within, but must needs look outside of himself for guidance and inspiration. The result of this is palpably evident. Humanity has fed upon

the husks of life instead of the kernel.

The Nazarene, who was earth's greatest demonstrator of Life, clearly proved that it "is the spirit that giveth life." The flesh profiteth nothing." No one could honestly saturate himself with the truth contained in that statement without perceiving that sickness, pain, poverty and decay are the concomitants of having worshipped the external instead of the spirit within.

The principle of mathematics is unchangeably perfect, whether one resides at the top of the highest mountain or is submerged leagues beneath the sea. Yet the child at

school may make a wrong computation. Who would blame the principle for the mistake? The teacher knows better, and looking over the sum, shows where to find the error, erase it, and apply the principle correctly. The result is a correct solution of the problem.

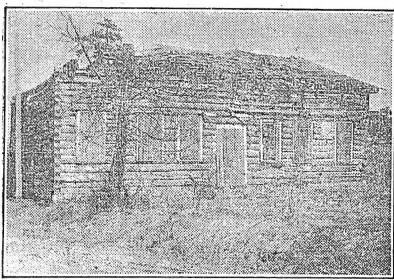

It is the same in music. The principle of music is ever harmonious. But the pupil, starting to apply it, may create discord. Shall we get mad at the principle of music and smash the piano?

Certainly not. Reveal the cause of discord, and have the student revert to principle. Harmony will thus be restored.

Why do I use these homely illustrations? Just to help put across the greatest truth in the universe, and that is, "The principle of all creation is good."

When man ceases to judge according to appearances, and begins to base all his thought and actions on "righteous judgment," or in other words, when he refuses to accept the testimony of the material senses, and trusts the intuition of soul, he begins, right there to grow out of all inharmony. Sickness, and all other forms of inharmony become less and less real to him, as he becomes more and more confident that God is all and God is goodness absolute.

To put it in plain English, it amounts to this: Whatever man believes in with all his heart and mind will become manifest in his life and environment. There is no escaping this law. "Out of the heart are the issues of life." A man thinketh in his heart so as a passenger station by the Canadian Pacific, but it was abandoned as a station when the town of Guelph outgrew it. Tradition has it that Galt, taking an ax from one of the axemen struck the first blow against the first tree to be felled, after which he and his party drank to the prosperity of Guelph.

GUELPH'S FIRST HOUSE TO BE RESTORED

At the instance of the Wellington Historical Society, the old Priory building of Guelph, Ontario, erected nearly a century ago by John Galt, the founder of that city, is to be restored. The various trades unions of Guelph have agreed to contribute the restoration and an endowment committee is now being carried on to accumulate the sum and the balance of the money required to rebuild, to replace the building as it stood on completion ninety-seven years ago. The old building was removed from its original site many years ago, and some of the original logs were replaced with newer ones, but there are still many of the timbers remaining. It was used first by the Canadian Company's agents in 1857. For some years the old priory building was utilized as a passenger station by the Canadian Pacific, but it was abandoned as a station when the town of Guelph outgrew it. Tradition has it that Galt, taking an ax from one of the axemen struck the first blow against the first tree to be felled, after which he and his party drank to the prosperity of Guelph.

Canadian National Railways**Big Stone News**

Messrs. Cornell and Morris made a record trip last Thursday from Blood Indian to Thackeray School districts on school business.

J. P. Moore lost a valuable cow recently. Being Irish, she could not thrive on the "Thistle".

The Elite of Big Stone met at the home of Mr. and Mrs. Falconer for a social evening. A very dainty lunch was served by the hostess, assisted by Nesdunes Harrington and Alissopp.

Mailcarrier Spriter has chartered the lifeboat "Emeralda" for his next two trips, when he will again use the "boneshaker".

Ducks and geese have been reported in the district.

Nerton Buehler left Calgary last week en route for Parkland; M. R. says he has a good job there. We wonder if there is any other attraction.

The report on the Boy Scout movement by the Editor of this Journal was much appreciated by all interested in this work.

Winter has lost its sting, but it was sure a "wasp" while it lasted. It was, likewise, hard on the coal-bin.

A number of our farmers are intending to sow millet and clover this season.

We are indeed glad to report that the little daughter of Mr. and Mrs. O. Savage, who was scalped very badly, is recovering and is doing as well as can be expected.

W. E. Morris and daughter, Capitol had to unhitch from the cutter and mount the horses to ford the river 'Shannon' between Dinwoodie's hill and the postoffice on Saturday evening last.

Wheat Shipments

Wheat shipments from the Alberta divisions of the two transcontinental railway companies for the 1924-25 season have totalled to date approximately 58,861,000 bushels. Making allowance for the shipment of wheat from Saskatchewan points on the Alberta divisions, the total for Alberta would be approximately 48,000,000 bushels. The largest shipments have been made from the Lethbridge division, which comprises the greater part of southern Alberta and from which division the wheat shipments have totalled to date 20,400,000 bushels.

New Statistics Book

A new booklet has been issued by the publicity branch of the department of agriculture graphically describing by charts and statistics the development of the province in agriculture and in other lines since its inception in 1905.

Remember the service in the Chinook Church next Sunday evening.
